Endless Possibilities

ABOUT US

"First Impression is the last Impression." Inspired by this principle rule of the interior design industry, Cedarlam Grandeur started this state of-art facility for manufacturing of decorative High pressure Laminates. Decorative Laminate are used to customize and beautify the surface of plywood and other base materials so as to suite the aesthetics and interiors of any given space.

We have also incorporated a 7-point Quality Control System to ensure that every single one of our laminate sheet goes through seven different quality control check points during its production period. Our consistent and strategic quality control system, all the way from raw material input level to finished goods level has accredited us with ISI 246 : 1995 certification. Our modern and E-governed management protocols has accredited us with the prestigious ISO 9001 : 2008 certifications. Our ability to minimize harmful effects on the environment and to achieve continual improvement of our environment performance has enabled us to get certified with ISO 14001 : 2004. Moreover, Laminates produced in our facility also meet the British European Standard BS EN 438 and the American NEMA LD3 standard.

Our facility has a state-of-art chemical plant, which manufactures resins in the production of laminates. Having a modern plant allows plant allows our R&D Team to experiment with innovative materials to produce quality resins that will stand the test of time. FSC Certification : We are glad to announce that we are the laminate company in India to be certified for compliance with the internationally recognized forest Stewardship Council (FSC) certification, FSC is an independent, non — government, not — for — profit organization established to promote the responsible management of the world's forests. FSC certification provides a credible link between responsible production and consumption of forest products, enabling consumers and businesses to make purchasing decision that people and environment as well as providing ongoing business value. Acquiring the FSC certificate is our small way of being a responsible corporate toward our environment, our future generations and to the society we live in.

Ageing Protection Guard In Cedarlam Grandeur decorative laminates, we have taken this technology a step further with a proprietary process called ageing protection Guard (APG). APG is a 2 pronged approach to further strength, density and increase surface resistant and impact resistance of our HPL sheets. First we focus on the ink used in printing of our design paper. All APG sheets are printed using High Density Plastisol inks. This type of inks differs from traditional water based ink because they have longer lasting shelf life and have greater surface resistance to withstand day - to - day and wet rubbing. Papers printed with this ink are resistant to the harmful effects of UV light. As a result the colors do not fade over time. To provide yet another layer of protection we add a special class of surface protection tissue paper on all laminate sheets. This paper, imported from a world class producer from Germany, is impregnated with titanium dioxide and pure melamine, which is essentially, doubles the life of the laminate surface. As combined results of using specialized inks and surface protection paper, our APG certified laminates out - shine and out - perform regular decorative High Pressure.
